

## USACE ALL-IN-ONE TOUCH SCREEN MONITORS

If space is an issue, these Corps approved wall-mounted touch monitors with integrated PC's are sure to fit the bill. Candela Display Systems offers an all-in-one digital signage solution ideal for interpretive presentations. Easy to install, these units ship complete with customized content per your USACE location.

## BENEFITS OF DIGITAL INTERPRETATION

Today's visitors expect more than just basic, and at times outdated static signage. Simultaneously, digital displays have improved dramatically in quality, reliability, and cost. Interpretive digital signage hosts a number of benefits in that it can convey a message available to many visitors at one time, it is self-sufficient without the requirements of staff to maintain, content is easily updated, and is available 24/7.

Digital signage content is also easily upgradeable. Utilizing the user-friendly PowerPoint editing interface, content is simple to update and maintain.
